Syed Mudaseer Quadri

AI & Data Science Undergraduate · Data Analysis · Machine Learning

Hyderabad, India · 8074139137 · syedmudaseerquadri@gmail.com · linkedin.com/in/syed-mudaseer-quadri · Portfolio: syedmudaseerquadri.github.io/data-science-portfolio

PROFILE

Artificial Intelligence and Data Science undergraduate with strong foundations in Python, SQL and data analysis. I clean and explore structured datasets, build classification models, and turn the results into clear business recommendations.

EDUCATION

Guru Nanak Institute of Technology CGPA 7.00

B.Tech in Artificial Intelligence & Data Science

PROJECTS

Telecom Customer Churn Prediction Nov 2025

- Analysed 7,043 customer records with Python, Pandas and Seaborn. Found that month-to-month contracts churn at 42.7% vs 2.8% for two-year, and that churners' median tenure is 10 months vs 38.
- Trained a Random Forest (30 one-hot features). Retuning it (balanced class weights, minimum leaf size 5) raised churn recall from 48% to 70% and ROC-AUC from 0.816 to 0.832.
- Turned the findings into four retention recommendations: contract upgrades, first-90-day onboarding, add-on bundles and monthly risk scoring.

Netflix & Streaming Market Analysis Apr 2025

- Explored Netflix's 8,807-title catalog: cleaned missing values (29.9% of directors blank), parsed dates and split multi-value genre and country fields.
- Analysed 777 monthly prices across 10 streaming services (2011–2024). Netflix rose 94%, and 13 of the 16 price hikes came in 2022 or later.

Sports Management System Mar–May 2024

- Full-stack system for players, matches, schedules and performance records, built with Node.js, Express, MongoDB and SQL. REST APIs and schemas were designed for querying and later analytics.

Hackathon Project (GDSC) Dec 2023

- Built a working prototype with a team under strict time limits, solving a real-world problem statement.

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript
Data Science: Data Cleaning, EDA, Feature Engineering, Classification (Random Forest), Churn Analysis
Libraries: Pandas, NumPy, scikit-learn, Matplotlib, Seaborn
Databases: MySQL, MongoDB
Backend: Node.js, Express, REST APIs
Visualization: Tableau, Power BI
Tools: Git, GitHub, Jupyter

CERTIFICATIONS

Python Certification, Udemy · Web Development Certification, Udemy
